As an extension of other programs that first introduce the game of golf to juniors, the NGF created FORE!, an initiative administered by the Nebraska Golf Association that provides opportunities for young golfers to play more frequently.

FORE! is based on the following formula. The NGA negotiates a preferred junior golf rate of \$10 with each participating facility. The FORE! member pays just \$4 each round they play with the NGF subsidizing the \$6 difference between the preferred rate and the FORE! member payment for each of those rounds.

FORE! creates accessibility, availability and affordability while encouraging a passion for the game. As confidence and skill level grow, so does the child's love of golf. Over 1,200 juniors participated in the FORE! program in 2016 with 5,000 rounds subsidized.

The Nebraska Golf Foundation was established to promote the growth of golf in Nebraska with an emphasis on making the game and its life-enhancing values accessible to youth.
